

MEDICAL TRAVEL

Looking for a unique way to show patients you care when they're far from home?

Consider placing **your logo**, or contact information on the front cover of the Personal Healthcare Journal. A little touch of home can help to relieve uncertainties and fears associated with treatment in another country.

The Personal Healthcare Journal gives patients a way to record their health information as it happens. Inside they'll record:

- * medications and vaccinations
- * allergies
- * tests
- * treatments
- * symptoms
- * questions for the doctor
- * answers received
- * and much more

A little peace of mind when far from home, goes a long way to ensure your patients have the best experience possible.

Consider partnering with My Care Necessities and offering your patients a sample copy of the Personal Healthcare Journal.
